*Let's talk size and price together.*

# HOW IT'S BUILT

## 01 You share your vision

What it's for, what it should hold, what it needs to feel like in the room.

## 02 Mockups, refined together

Concepts go back and forth until we're both looking at the same final design.

## 03 50% deposit to start

Once the design is locked, the deposit puts it on the bench.

## 04 Built by hand, ~1 month

Every layer poured, cured, and sanded in sequence, no shortcuts on cure time.

## 05 Shipped, balance due

The remaining 50% is collected once your table ships.
